WORK EXPERIENCE

HCL Tech

Nov 2023 - present

- Designed and developed scalable **payment processing systems** with intuitive **React.js dashboards**, enabling real-time transaction monitoring and analytics.
- Built and optimized **RESTful microservices** using **Node.js** and **Express.js**, and integrated them with responsive frontend applications.
- Developed dynamic and reusable UI components using **React.js**, improving user experience, performance, and maintainability.
- Implemented **event-driven architecture** with asynchronous workflows and reflected real-time updates on frontend using efficient state management.
- Architected backend systems using **AWS (EC2, Lambda, S3, DynamoDB)** and connected them with frontend for seamless full-stack delivery.
- Designed secure and scalable **end-to-end payment flows**, ensuring consistency across frontend and backend layers.
- Integrated third-party **payment gateways** and exposed user-friendly UI flows for smooth transaction experiences.
- Strengthened application security using **JWT, OAuth2**, secure cookies, and frontend validation best practices.
- Implemented **rate limiting, throttling, and error handling**, along with frontend feedback mechanisms for better user interaction.
- Worked with **SQL** and **NoSQL (MongoDB, DynamoDB)** databases, optimizing data flow across backend and frontend systems.

MBS STUDIOS

May 2023 - Oct 2023

- Built server-side logic and middleware with **Express.js** for data transformations, request validation, and error handling, increasing backend efficiency by 15%.
- Implemented load balancing and scaling strategies, boosting backend service capacity and system uptime by 10%.
- Developed and maintained frontend applications with **ReactJS, Redux, JavaScript**, and **SCSS**, improving functionality and reducing code complexity.
- Optimized website performance by addressing frontend bottlenecks, reducing page load time by 10%.
- Collaborated closely with UI/UX teams to deliver responsive, user-friendly web applications, improving customer satisfaction by 15%.

PROJECTS

AI ChatBot

[Link](#)

- Built a user authentication and authorization system, protecting routes with **JWT** tokens and **HTTP-only cookies**.
- Validated user input using **express-validator** middleware.
- Integrated **OpenAI API** with a **Node.js/Express.js** backend in a **MERN** stack application.
- Stored user chats securely in **MongoDB**.

URL Shortener Service

- Designed and developed a URL shortener backend service using **Node.js, Express.js**, and **MongoDB**.
- Built RESTful APIs to generate, redirect, and track shortened URLs.

EDUCATION

2019 - 2023	Btech(EE) at Madan Mohan Malaviya University Of Technology	(CGPA: 7.76/10)
2018	Class 12th CBSE Board	(79.6)
2016	Class 10th CBSE Board	(89.3)

SKILLS

Programming Languages:	C, C++, SQL, JavaScript, HTML
Backend Technologies:	Node.js, Express.js, RESTful APIs, MongoDB
Frontend Technologies:	ReactJS, Redux, Tailwind CSS, SCSS
Containerization and DevOps:	Docker, CI/CD
Developer Tools:	Git, VS Code, Visual Studio, Azure DevOps
Concepts:	Low-Level System Design (C++), DBMS, Computer Networking, Object-Oriented Programming
DSA:	Solved 800+ problems on LeetCode, codeforces, codechef
